

@api

Feature: Test Content Type Functionality

Scenario: Create test content with correct role

Given I am logged in as a user with the "administrator" role

When I visit "/node/add/test\_content\_type"

And I fill in "Title" with "Test Content 1"

And I fill in "Body" with "Test Body"

And I press the "Save and Publish" button

Then I should see the following success messages:

| Page Page has been created. |

And I should see "Test Content 1"

And I should see "Test Body"

Scenario: Attempt to create page content without correct role

Given I am logged in as a user with the "authenticated" role

When I am on "/node/add/test\_content\_type"

Then the response status code should not be 200

Scenario: Attempt to create page content while not logged in

Given I am an anonymous user

When I am on "/node/add/test\_content\_type"

Then the response status code should not be 200

Scenario: I see the correct page content

Given "test\_content\_type" content:

| title |

| Test Page 1 |

And I am logged in as a user with the "administrator" role

When I go to "admin/content"

Then I should see "Test Content 1"
