

Easier Development and Deployment
@bhosmer - @ron_williams

Why?

Benefits

- Reduce costs
- Inherent config management
- Build once, use everywhere
- Fewer broken deployments

What?

This technology isn't new!

How?

- Boot2Docker
- Kitematic
- Virtualbox/Vagrant
- Native (Linux Only)
- Shipyard / Project Atomic

Containers are

Why Use Docker?

- Save on hosting & labor
- Simplify change management
- Reuse environments
- Deploy successfully
